Both hatch and frame in the access panel solution is made entirely out of gypsum plasterboard, so it is fully recyclable.

Gyptone BIG Access Panel has an opening of 510x510 mm.

Gyptone Access Panel fits with these Gyptone BIG products:
- Gyptone BIG Line 6
- Gyptone BIG Quattro 41
- Gyptone BIG Quattro 42
- Gyptone BIG Quattro 46
- Gyptone BIG Quattro 47
- Gyptone BIG Quattro 71
- Gyptone BIG Sixto 63

Gyptone BIG Access Panel provides easy access to installations above the ceiling and is fully integrated in a ceiling without any visible joints.

The Gyptone BIG Access Panel is an inspection hatch for fast and easy access to wires or pipes situated behind the ceiling. It is possible to get the access panel in the same patterns as the Gyptone BIG range and it is an aesthetic part of a BIG board ceiling, as the access panel is fully integrated into the ceiling surface.

The Gyptone BIG Access Panel is faster to install than other solutions for access through a gypsum ceiling, thanks to the easy installation method and the adapted measurement of the Panel. The access panel is almost invisible and provides an optimal solution for easy access to all underlying installations behind a fixed ceiling.
**Product description**

Gyptone BIG Access Panel is used together with Gyptone BIG boards for better and easier access to the plenum above the ceiling. Hatch and frame is made out of gypsum plasterboard and are 100% recyclable.

**Construction height**

The smallest possible standard construction height, where it is possible to open the hatch is 35 mm.

**Surface**

Gyptone BIG is supplied unpainted. The surface finish is done on site after jointing is completed. Ceilings must be painted with a short-haired roller. The boards must not be spray-painted as this considerably impairs sound absorption.

**Dimensions**

Access Panel incl. the frame = 600x600 mm. Opening for inspection = 510x510 mm.

**Load**

No load must be applied to the Access Panel.

**Installation**

For installation instructions please see installation manual for Gyptone BIG Access Panel.

**Versions**

Gyptone BIG Access Panel fits all standard Gyptone BIG boards in the format 1200x2400 mm:
- Gyptone BIG Line 6
- Gyptone BIG Quattro 41
- Gyptone BIG Quattro 42
- Gyptone BIG Quattro 46
- Gyptone BIG Quattro 47
- Gyptone BIG Quattro 71
- Gyptone BIG Sixto 63

**Fire**

A2-s1, d0

**Dimensional stability**

Gyptone BIG should be used in areas with a relative humidity which does not constantly exceed 70%.

**Weight**

Frame = 0.9 kg
Hatch = approx. 3.6 kg

**Cleaning**

Depends on the surface treatment.

**Maintenance**

By minor damage on edges or surface, filler and paint can do the repair.
